THE CHOICE OF CHAMPIONS

In some respects, motocross was born in the Netherlands.

It was here, in 1947, that the Dutch national motorcycle federation hosted an international "scramble" for teams from Great Britain, Belgium and the Netherlands, and called it a "moto-cross."

While the sport's popularity grew steadily over the next 25 years, one thing that remained constant was the frustration of off-road biking in the Netherlands. The lowland dunes and fields offered the perfect terrain for riding, but the stock paper air filters of the day were no match for the sandy, gritty soil. There was a paper filter with a single layer of foam, but even that didn't cut it for protection; after 30 minutes it was shot.

In 1972, the motocross world was given a historic boost by a revolutionary product: a laminated, dual-foam air filter that, when soaked in a special oil, allowed free airflow into the carburetor while keeping dirt, grime, sand and water out of it. It was effective, durable, washable and reusable. It took off, and the little start-up company that invented it, called Twin Air, hasn't stopped ever since.

Evolving continually with motorcycle design and technology, Twin Air filters and accessories have stayed ahead of the competition for half a century. Today they are available for all Motocross and ATV vehicles, and distributed worldwide. Twin Air filters are OEM-specified for 20+ motorcycle companies. Including KTM, Husqvarna, Gas Gas, Sherco, Beta + more!

Since 1972 Twin Air supported over 300 World Champions.
Twin Air is proud to show the Twin Air supported Champions of 2019!

For over 40 years,
Champions around the
world have relied on the
Twin Air system for
unbeatable performance
and protection.

Original Dual-Stage Air Filter | OEM Replacement

This is where it all began.

Twin Air standard OEM replacement filters are constructed of two layers of open-pore polyester foam that are bonded together to provide maximum filtration and superior airflow. The total foam thickness is 15mm.

The fused dual layers of open-pore outer foam and fine inner foam trap even the smallest particles. The new, rounder design boosts airflow. So do the minimised seams, made possible by a revolutionary micro-gluing process: **Shorter seams = more foam = more flow**

- Dual-Stage Foam
- 15mm Thick
- 60/45 Pores/Inch

- DUAL-LAYER FOAM DESIGN
- ASSEMBLED BY HAND AND INSPECTED FOR A PERFECT FIT
- WASHABLE / REUSABLE

PART #:	DESCRIPTION:	FITMENT:	RRP:
TA154116	Dual-Stage Air Filter	KTM/HUSQ 250/350/450 SXF/EXCF/TE/TC/FE/FC 2016-20	\$32.95

Factory Pre-Oiled (X)

- Pre-Oiled Dual-Stage Foam
- 15mm Thick
- 60/45 Pores/Inch

The Original Dual-Stage Air Filter is completely submerged in **BIO Liquid Power Filter Oil**.

The filter is then massaged to ensure all pores are evenly coated with oil, it's then placed in a temperature controlled room to allow the oil to completely cure. **You just open the resealable bag and install!**

- PRE-OILED WITH BIO LIQUID POWER
- WASHABLE / REUSABLE
- ADD "X" TO STANDARD PART #

PART #:	DESCRIPTION:	FITMENT:	RRP:
TA154116 X	Pre-Oiled Air Filter	KTM/HUSQ 250/350/450 SXF/EXCF/TE/TC/FE/FC 2016-20	\$35.95

Extreme / Dust / Sand Air Filters (BR)

- 33% Increased Protection
- Dual-Stage Foam
- 20mm Thick
- 60/45 Pores/Inch

Twin Air Extreme / Dust / Sand filters have 33% increased protection over standard filters. Both protective layers are 33% thicker than the original dual-stage filter. Offering superior protection the foam (60/45 Pores) is bonded together to provide maximum filtration and superior airflow.

Part #: TA154116 BR	Fitment: KTM/HUSQ 250/350/450 SXF/EXCF/TE/TC/FE/FC 2016-20	RRP: \$35.95
----------------------------	--	--------------

Dust Covers (DC)

- Single-Stage Foam
- 10mm Thick
- 30 Pores/Inch

The Dustcover (DC) is a single white layer (10mm) open pore foam. Fit over the air filter when riding in severe conditions such as heavy dust and sand.

Part #: TA154116 DC	Fitment: KTM/HUSQ 250/350/450 SXF/EXCF/TE/TC/FE/FC 2016-20	RRP: \$21.95
----------------------------	--	--------------

Filter Skins

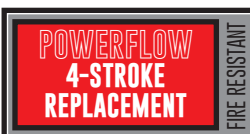

- Single-Stage Nylon Layer
- Captures 90% of Dirt & Dust

The skin acts as an extra layer of protection, for when you are riding in sandy or dusty conditions. The skin is an orange single stage nylon (polyamide) layer that captures 90% of dirt and dust.

Part #: TA160000GPBK1	Fitment: KTM/HUSQ 250/350/450 SXF/EXCF/TE/TC/FE/FC 2016-20	RRP: \$39.95
-----------------------	--	--------------

Powerflow Replacement Air Filters / Fire Resistant (FR)

- Triple-Stage Foam
- 15mm Thick
- 30/60/45 Pores/Inch

Power Flow Replacement 4 Stroke Fire Resistant (FR) replacement filters are three layers of open-pore polyester foam (30/60/45 Pores) that are bonded together to provide maximum filtration and superior airflow. The total foam thickness is 15mm. Features free-flowing, backfire-resistant foam laminated to the inside of the filter—eliminates restrictive, stock backfire screen for four-stroke engines.

Part #: TA154218 FR	Fitment: KTM/HUSQ 250/350/450 SXF/EXCF/TE/TC/FE/FC 2016-18	RRP: \$35.95
----------------------------	--	--------------

UPGRADE ADV AIR FILTER KITS

SUPER EASY INSTALLATION!

- Triple-Stage Foam
- 15mm Thick
- 30/60/45 Pores/Inch

Twin Air has a range of Adventure Upgrade Air Filter Kits available.

The Twin Air Adventure Upgrade Kits use Triple-Stage Foam Air Filters and have a Filter Frame replacing the OEM paper filter.

The foam Air Filter (30/60/45 Pores) is 15mm thick and gives your bike better protection and performance.

Adventure Upgrade Kits include a Pre-Oiled Triple-Stage Foam Air Filter (FRX) and filter frame that are easy to install.

The foam air filter part can be replaced separately without buying another complete kit.

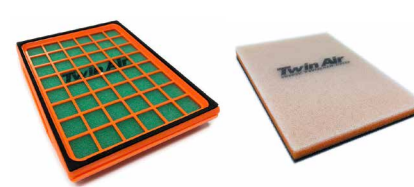

HONDA AFRICA TWIN

Part #: TA150607P	Frame & Filter	RRP: \$144.95
Part #: TA150607FR	Replacement Filter	RRP: \$35.95

KTM ADV 1050/1090/1190/1290

Part #: TA154523FR	Replacement Filter	RRP: \$19.95

KTM ADV/R 790

Part #: TA154524P	Frame & Filter	RRP: \$89.95
Part #: TA154524FR	Replacement Filter	RRP: \$19.95

HUSKY 701 & KTM 690

Part #: TA155510P	Frame & Filter	RRP: \$69.95
Part #: TA155510FR	Replacement Filter	RRP: \$24.95

Normal Loamy Riding Conditions

We advise using the Original Dual-Stage Twin Air filter, pre-oiled with **Liquid Bio Power Filter Oil**.

If you are using the 2-stroke cage (without backfire screen) on a 4-stroke bike, we advise using our Fire Resistant (FR) filter oiled with Liquid Bio Power Filter Oil.

Dusty Riding Conditions

Use a **DRY** Twin Air Filter Skin as a pre-filter on top of an **OILED** Original Dual-Stage Filter. Twin Air Filter Skins are always a dry application.

Very Dusty Riding Conditions

We advise you add a lightly **OILED** Dust Cover (DC) on top of an **OILED** Original Dual-Stage Filter.

Heavy Sand & Dusty Riding Conditions

In heavy dust and sandy riding conditions, we advise to use a single **OILED** Extreme/Dust/Sand Filter (BR).

Extreme Dust / Extreme Sand / Extreme Mud Riding Conditions

In extremely dusty and sandy riding conditions we advise to use:

- BR **OILED** TwinAir Filter
- + On top of this use a lightly pre-oiled Dust Cover.
- + On top of the Dust Cover, use a dry Air Filter Skin.

Airbox Cover & Airbox Wedge

Prevent water and cleansers from entering your intake when you clean your airbox!

COVER

Airbox Covers are manufactured from tough, durable ABS plastic. A rubber sealing ring is provided to ensure a perfect, leak-free fit.

Remove air filter from the airbox and install the Airbox Cover with the provided mounting screw.

WEDGE

Used in combination with the **KTM / HUSQ 85** Airbox Cover. The 85SX and TC85 airbox is very flexible which allows water to go through when washing the bike. The wedge is used to keep the airbox plastic in its place when the outside airbox lid is removed. **Part #: TA177825**

MORE AIR **MORE POWER!**

Dual-layer foam is sculpted to provide maximum surface area in your cramped airbox . Where needed, a 3-layer foam with a backfire-resistant layer is used to eliminate the restrictive, stock backfire screen. A billet-aluminum internal cage that fills and supports the filter, reducing engine-pulse distortions . In short, anything that will make your bike's engine dirt-tight and running at it's very best . Plus, it's all developed with and used by the Factory Race Teams.

The PowerFlow Kit . Only from TwinAir.

POWERFLOW
AIR FILTER KITS

Lightweight, leak-proof, fool-proof fit ensures high-performance!

The best filter in the world can't do it's job if there are leaks in the seal of the airbox. TwinAir's PowerFlow Kits ensure a leak-proof, fool-proof fit with a rigid, lightweight, billet-aluminum cage that replaces your flimsy, plastic stock cage, and a billet aluminum flange with a rubber seal that bolts tight to your airbox.

Our PowerFlow Kits use open cages without backfire screens and higher performance filters, **in general this always creates more airflow for the bike!**

All 4T PowerFlow Kits include a Pre-Oiled Triple Stage **Fire Resistant** Air Filter.

- NO BACKFIRE CAGE
- ANODIZED FOR DURABILITY
- LIGHTWEIGHT ALUMINIUM FLANGE
- PRE-OILED TRIPLE-STAGE FIRE RESISTANT AIR FILTER

Airbox Sealing Rings (ISR,OSR)

Fix leaky airbox issues! PowerFlow Upgrades & OE Replacements.

Airbox Sealing Rings are an upgrade to the PowerFlow Kit. It is utilised to assist with the mounting of the Air Filter Skin to ensure it stays perfectly in place. It can also be used with the OEM cage to allow better mounting of an air filter skin.

Part #: TA150120ISR Intake | Honda CRF 250R 2010/2013 CRF 450 2009/20120

RRP: \$49.95

THE COMPLETE SYSTEM!

Keep your air filter clean and you'll keep your engine running at top power - and running longer. The System is the solution - everything you need in a sturdy storage box with carry handles.

ORIGINAL

The Twin Air System Complete Air Filter Maintenance kit includes:

- Twin Air Cleaning Tub
- Twin Air Oiling Tub
- Twin Air Liquid Power Filter Oil
- Twin Air **Liquid Power** Dirt Remover
- Twin Air Contact Cleaner
- Gloves

PART #:	FITMENT:	RRP:
TA159000	The Twin Air System (Complete Air Filter Maintenance Kit)	\$119.95
TA159010	Oiling Tub (3L)	\$12.95
TA159011	Cleaning Tub (10L)	\$16.95

THE COMPLETE SYSTEM!

Keep your air filter clean and you'll keep your engine running at top power - and running longer. The System is the solution - everything you need in a sturdy storage box with carry handles.

BIO

Biodegradable and environmentally safe to put down the drain.

The Twin Air System Complete Air Filter Maintenance kit includes:

- Twin Air Cleaning Tub
- Twin Air Oiling Tub
- Twin Air Liquid BIO Power Filter Oil
- Twin Air **Granulated** BIO Power Dirt Remover
- Twin Air Contact Cleaner
- Gloves

PART #:	FITMENT:	RRP:
TA159000BIO	The Twin Air System BIO (Complete Air Filter Maintenance Kit)	\$89.95
TA159010	Oiling Tub (3L)	\$12.95

AIR FILTER OILS & CLEANERS

TwinAir Oils & Cleaners

ORIGINAL LIQUID AIR FILTER OIL

The original formula that set the standard of excellence in air filter oils. Many filter oils have a tendency to drain to one side, leaving part of your filter unprotected. Blue ORIGINAL Liquid Power starts thin for deep penetration, then dries evenly to microcoat the foam cell walls with a shield that repels dirt while accelerating airflow.

PART #:	FITMENT:	RRP:
TA159016M	Air Filter Oil Spray (500ml)	\$19.95
TA159015	Air Filter Oil Tin (1L)	\$24.95

ORIGINAL LIQUID PACK

PART #:	FITMENT:	RRP:
TA159007	Liquid Power Spray + Liquid Dirt Remover Spray Pack (2x500ml)	\$39.95

ORIGINAL LIQUID DIRT REMOVER

Formulated to quickly cut through ORIGINAL Liquid Power, loosen the dirt and flush your filter clean. Will not harden or damage filter foam like solvents and gasoline do.

PART #:	FITMENT:	RRP:
TA159006	Dirt Remover Spray (500ML)	\$22.95
TA159002	Dirt Remover Tin (4L)	\$49.95

MULTI-PURPOSE CONTACT CLEANER

Clean your airbox, cage and more with this fast drying formula that leaves no residue. Safe for plastic and painted surfaces!

PART #:	FITMENT:	RRP:
TA159003	Contact Cleaner Spray (500ml)	\$13.95

TwinAir Oils & Cleaners

BIO LIQUID AIR FILTER OIL

Like Original Formula, green BIO Liquid Power microcoats the foam cell walls prevents dirt, dust, mud and even water from entering your carburetor. Boost your bike's performance with the first biodegradable air filter oil that works in all riding conditions.

PART #:	FITMENT:	RRP:
TA159018M	BIO Air Filter Oil Spray (500ml)	\$22.95
TA159017	BIO Air Filter Oil Tin (1L)	\$29.95

BIO LIQUID PACK

PART #:	FITMENT:	RRP:
TA159020	Bio Pack (Liquid Bio Dirt Remover - Air Filter Oil 1 liter)	\$59.95

BIO LIQUID DIRT REMOVER

Clean your BIO Liquid Power-oiled filter with BIO Dirt Remover. Mixed with hot water, the granular cleaner quickly cuts through the filter oil. Hand-wash your filter in a bucket. BIO Liquid Dirt remover is environmentally safe to put down the drain.

PART #:	FITMENT:	RRP:
TA159004	Bio Dirt Remover (900 Grams)	\$24.95

BIO AIR FILTER SEALANT

Extra defense in extreme / dusty conditions! Airtight, Water-Proof and Dust-Proof. Unlike grease, it will not dissolve under high heat or solidify in extreme cold. Biodegradable after removal with Twin Air Contact Cleaner.

PART #:	FITMENT:	RRP:
TA159030	Bio Sealant/Grease (100ml)	\$17.95

IceFlow High-Performance Coolant

**KEEP YOUR
ENGINE** *COOL*

**MAKE MORE
POWER!**

Keep your engine cool and maintain Peak Performance with Twin Air IceFlow Ready Use Coolant.

Twin Air has added a high performance, biodegradable coolant to its product line of motorcycle and ATV/UTV's filtration products. IceFlow is a ready-to-use coolant formulated for long-lasting protection of all metals inside today's motorcycle cooling systems, without harming the water pump seals.

- The new coolant offers the added assurance of an extreme freezing point (-26°C / -14.8°F).
- IceFlow is Mono Propylene Glycol-based, **silicate-free** and formulated with demineralization water and cutting-edge nanotech and organic additive technology.
- It is non-toxic and biodegradable.

PART #:	FITMENT:	RRP:
TA159040	IceFlow High Performance Coolant (2.2L)	\$29.95

TwinAir Oil Coolers

KEEP YOUR ENGINE **COOL** MAKE MORE **POWER!**

Peak Performance for Longer!

Lowering the temperature of the oil (and your water temp accordingly) TwinAir's patented oil cooler keeps your engine running at peak performance for longer.

TwinAir's solution is a revolutionary improvement. Unlike traditional coolant-based approaches that tap into the water cooling system, TwinAir's design is the first air-cooled driven solution. From a mounting panel behind the radiator, flexible hoses circulate oil to a unique, tubular cooling grill designed to maximize heat exchange. The TwinAir Oil Cooler kit includes everything you need –heat exchanger, mounting hardware, oil filter cap, hoses, clamps and step-by-step instructions.

- By circulating the oil up and down multiple pipes simultaneously, flowspeed is controlled and heat exchange is maximized.
- Better aerodynamics. The airflow follows the surface of a round pipe better than small flat blades.
- The pipes are gapped to minimize mud/sand build-up.
- Installs at the base of the radiator, where the water and surrounding air temps are lowest.
- Aluminum mounting panels are customized to each bike model.
- Maintenance-free

Replacement oil filters and o-rings are available!

TESTED: Kawasaki KX450F

Time	Water Temp.	Oil Temp.

Radiator Caps

TwinAir's Ice Flow radiator cap increases the boiling point of the water in your bike's radiator by increasing the amount of pressure inside the radiator. **The difference between a stock radiator cap and a high-pressure one is dramatic.**

PART #:	FITMENT:	RRP:
TA177900	Pressure Cap (1.8) Honda/Kawasaki/Yamaha/Suzuki	\$34.95
TA177901	Pressure Cap (2.0) KTM SX-F 2008/2015 EXC-F/XC-F 2008/2016	\$34.95

Fan Protector

PART #:	FITMENT:	RRP:
TA177759SL99G	KTM/Husqvarna Enduro Models	\$34.95

Fuel Filters

TwinAir's monofilament screen pocket inserts in your tank to catch particles as small as 40 microns (.00165") while allowing the gas to flow freely. The flange is custom-sized for each modern 4-stroke model to ensure a leak-proof seal. Just remove the filter periodically, turn it inside-out, and clean out the debris that could have been in your engine.

POWERFLOW THROTTLE BODY KIT

PowerFlow Throttle Body Kit

Get faster, smoother throttle response where you need it most.

Twin Air's PowerFlow Throttle Body Kits can significantly increase horsepower and throttle response in low to mid range. The PowerFlow Throttle Body Kit is an off shelf, easy to install, throttle body performance kit.

- **Get faster, smoother throttle response where you need it most**
- **Eliminate high-end flow loss by lowering flow restriction**
- **Install/remove without damaging the OEM throttle body**
- **Count on maintenance-free reliability after installation**

**The kit comes with two different performance options.
One for low-mid range performance and the other for top end performance.**

The Twin Air Powerflow Throttle Body Kit **Configuration #1** provides low-mid range gains utilizing a smaller diameter intake tube and a lower profile throttle valve. This configuration increases the throttle response making the power more controllable.

Configuration #1

The Powerflow Throttle Body Kit **Configuration #2** is designed for increasing top end power gains by reducing the surface area of the throttle body valve. This configuration does not use the orange intake tube.

Configuration #2

PowerFlow Throttle Body Kit

Get faster, smoother throttle response where you need it most.

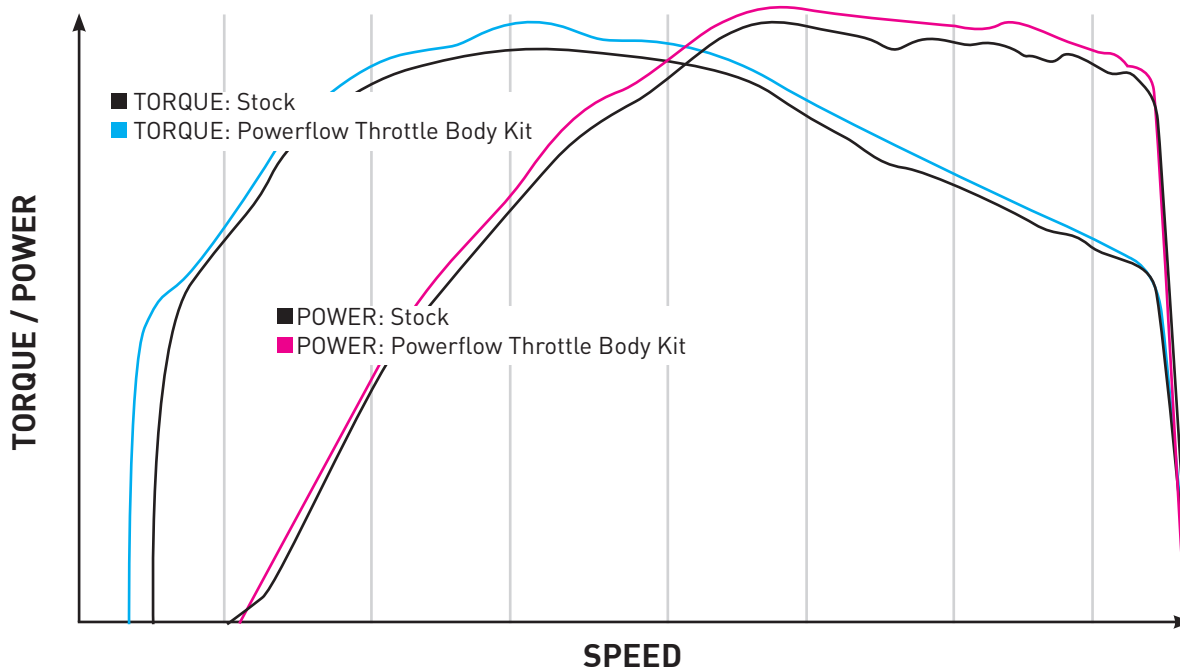

Kit Includes: Orange intake tube, shaft, butterfly valve (small diameter) and two bolts.

RRP: \$399.95

TESTED: Kawasaki KX250F Equipped with a Twin Air Powerflow Throttle Body Kit.

Throttle Position Sensor Tool (TPS)

The Twin Air Throttle Position Sensor (TPS) tool is designed to be used with Twin Air Powerflow Throttle Body Kit. The Twin Air TPS system allows you to fine tune your Throttle Position Sensor on your bikes to the correct ohms.

Features:

Used in conjunction with the Twin Air Powerflow Throttle Body Kit.

Designed to fine tune your Throttle Position Sensor (TPS) to the correct ohms.

PART #:	FITMENT:	RRP:
TA160799	TPS-Tool	\$139.95

TPS connection tables:

Connect the TPS-tool pins to the TPS-sensor pins as shown in tables below.

Extra information:

- When turning on the TPS-tool unconnected, 1 . will appear on the display.
- Measurement range 0-20k ohm.

Universal Foam

Skid Plate Foam:

This black polyurethane/polyester reticulated foam fits between the skid plate and the engine, keeps sand, grid and dirt from sticking to the engine, can also be used on other places of the bike.

PART #:	FITMENT:	RRP:
TA160001	Twin Air Skid Plate Foam (300X120X40mm, Black)	\$24.95
TA160002	Twin Air Single Stage Foam (600X300X10mm, Orange)	\$54.95
TA160003	Twin Air Dual Stage Foam (600X300X15mm, Orange/White)	\$59.95
TA160003B	Twin Air Single Stage Foam (600X300X20mm, Orange)	\$64.95
TA160004	Twin Air Triple Stage Foam (600X300X18,5mm, Orange/White/Black)	\$79.95

Footpeg Foam

Foam that fits around the foot pegs, and keeps sand, stones, grid and dirt from sticking on or between the foot pegs.

PART #:	FITMENT:	RRP:
TA177758	Foot Peg Foam (Outside Dia 70mm/ Inside Dia 30mm/Width 80mm)	\$19.95

Fuel Tank Foam

Fuel Tank Foam:

Used in large tanks of high performance vehicles, these impenetrable polyurethane polyester cubes baffle fuel to control surging, eliminate sloshing and the slapping noise, and stabilize fuel movement during sharp turns. Performance is improved, and fuel capacity loss is less than 1%.

PART #:	FITMENT:	RRP:
TA160005BK	Twin Air Petrocel Fuel Tank Foam (50X50X50mm - Blue/100pcs = 12,5 liter)	\$89.95
TA160005BKA	Twin Air Petrocel Fuel Tank Foam (50X50X50mm - Blue/50pcs = 6,25 liter)	\$44.95

TwinAir Oil Filters

The company that set the clean air standard for your engine extends their expertise to oil filters. Coupling a high-quality paper mesh construction with the latest in oil filter technology. TwinAir oil filters meet and exceed standards required by modern motorcycles.

- **The Latest in Oil Filter Technology**
- **High-Quality Paper Mesh Construction**
- **Direct OEM Replacements**
- **Meet OEM Efficiency Requirements**
